

Sublittoral Rock – General Habitat Model

Legend

Driver Relevance to Infralittoral/Circalittoral

- Low Relevance Infralittoral (light orange square)
- High Relevance Infralittoral (dark orange square)
- Low Relevance Circalittoral (light blue square)
- High Relevance Circalittoral (dark blue square)

Degree of Natural Variability

- Low natural variability (small black dot)
- Moderate natural variability (medium black dot)
- High natural variability (large black dot)

--- Feedback (dashed blue line)

— Driving Influence (solid black line)

— Positive Interaction (solid green line)

— Negative Interaction (solid red line)

Version 1.0

Please see accompanying report for model restrictions and limitations
