<i>List of Plates</i>	page vii
<i>Preface</i>	xi
I INTRODUCTION	I
A brief chronology of 'Torrey Canyon' events—the Plymouth Laboratory and the 'Torrey Canyon' investigations—scientific programmes—some aspects of collaboration and liaison	
2 OIL AND DETERGENTS	II
Oil properties—loss by evaporation—water-in-oil emulsions; detergents—components: solvent, surfactant and stabilizer—brands compared—some physical properties of BP 1002 and methods of estimation—the stability of detergent-oil emulsions	
3 SEA SURVEYS	23
Cruises I, II and III—distribution of detergent—phytoplankton—zooplankton—benthic organisms—subsequent cruises—observations in retrospect	
4 SHORE SURVEYS—ROCKY SHORES	36
Introduction—arrival of the oil—areas studied—Marazion—Trevone—relative sensitivity of different species at Porthleven Reef—graded effects of spraying—effects of oil without detergent—summary of effects of heavy detergent treatment—summary of reasons for survival from detergent poisoning—recovery and recolonization—summary and conclusions on rocky shores	
5 SHORE SURVEYS—SANDY SHORES AND ESTUARIES	75
Sandy shores (methods of cleaning)—some physical properties of sands containing oil and detergent—oil content of sand—further observations on sandy shores (Mawgan Porth and Sennen)—biological degradation—fauna—influence of detergent on the settlement of larvae and the recolonization of sands—drift line—estuaries—conclusions on the use of detergent and other methods of treatment of shore and estuarine deposits	
6 OFFSHORE SPREAD AND TOXIC EFFECTS OF DETERGENTS SPRAYED ON SHORES	91
Porthleven area—the formation and behaviour of mixed oil and detergent patches—the persistence of detergent patches—conclusions—biological effects of offshore detergent patches—offshore surveys at Porthleven—various animals affected—summary of M.B.A. diving surveys near Porthleven and at other localities	

7	TOXICITY EXPERIMENTS	<i>page</i> 115
	Laboratory investigations into the toxicity of oil and detergents— toxicity studies on zooplankton—longer-term effects on zooplankton species during rearing—toxicity studies on phytoplankton—toxicity studies on intertidal and sublittoral organisms—bioassay methods— toxicity and stability of components of detergent—conclusions and significance of toxicity experiments	
8	THE PATTERN OF OIL DISCHARGE AND OIL MOVEMENTS FOLLOWING THE WRECK	150
	Movement of oil with wind—fate of oil released on different oc- casions—quantities stranded in different areas—conclusions	
9	OIL POLLUTION IN FRANCE AND GUERNSEY	163
	Oil pollution at sea—quantities and French methods—observations from 'Sarsia'—barrages and booms—condition of the beaches—north and west coasts of Brittany—methods of treatment—oil pollution in Guernsey	
10	SOME LESSONS LEARNT	174
	Summary of main results—pollution—the biological aspect—'Torrey Canyon' programme and procedures in retrospect—organizational requirements for future emergencies—a final comment
