

Sub-model 7. Non Predatory Mobile Fauna

1. Regional to Global Drivers

2. Water Column Processes

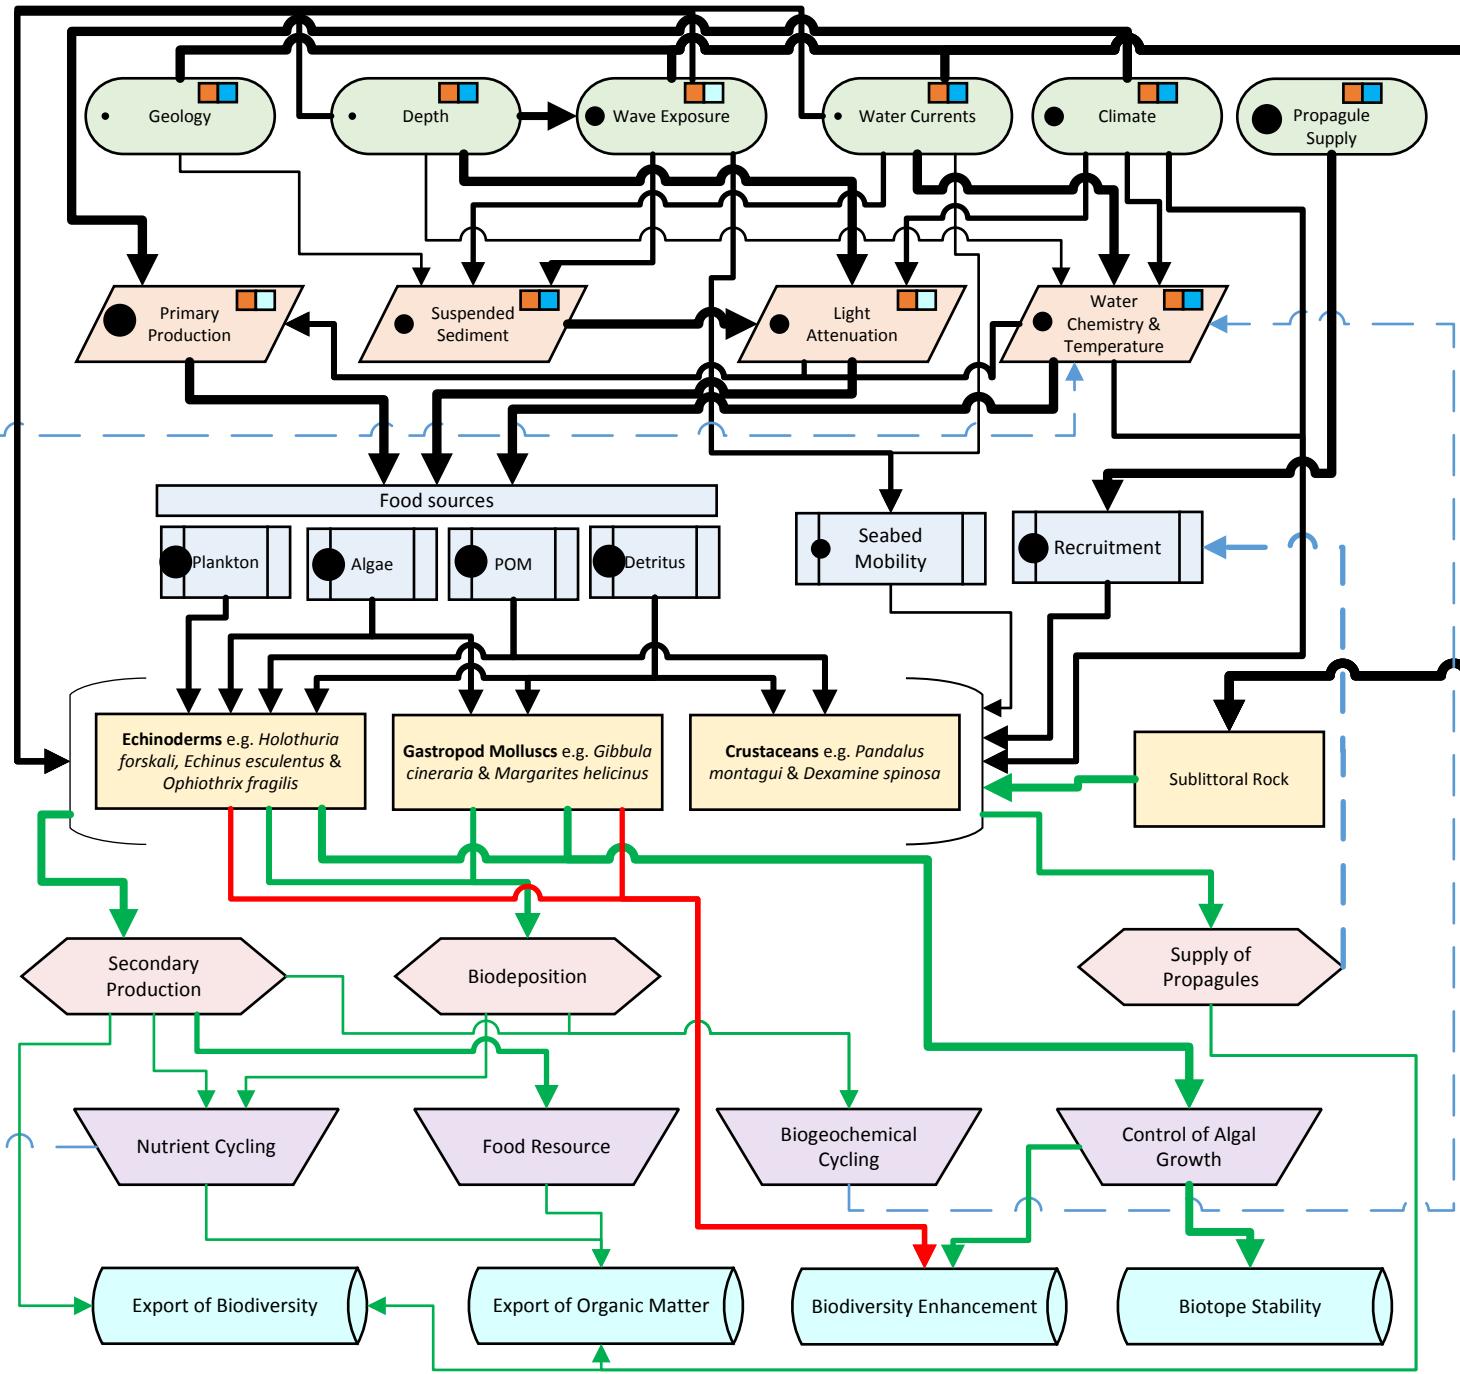

3. Local Processes/Inputs at the Seabed

4. Habitat and Biological Assemblage

5. Output Processes

6. Local Ecosystem Functions

7. Regional to Global Ecosystem Functions

Legend

Magnitude of Influence

- Small (thin line)
 - Medium (medium line)
 - Large (thick line)
- Driving Influence
- Positive Interaction (green line)
 - Negative Interaction (red line)
- Feedback

Driver Relevance to Infralittoral/Circalittoral

	Infralittoral	Circalittoral
Low Relevance	Low Relevance	Infralittoral
High Relevance	Infralittoral	High Relevance
Low Relevance	High Relevance	Low Relevance
High Relevance	High Relevance	Circalittoral

Degree of Natural Variability

- Low natural variability (light gray dot)
- Moderate natural variability (medium gray dot)
- High natural variability (dark gray dot)

Version 1.0

Please see accompanying report for model restrictions and limitations
