

Sub-model 5. Tube Building Fauna

1. Regional to Global Drivers

2. Water Column Processes

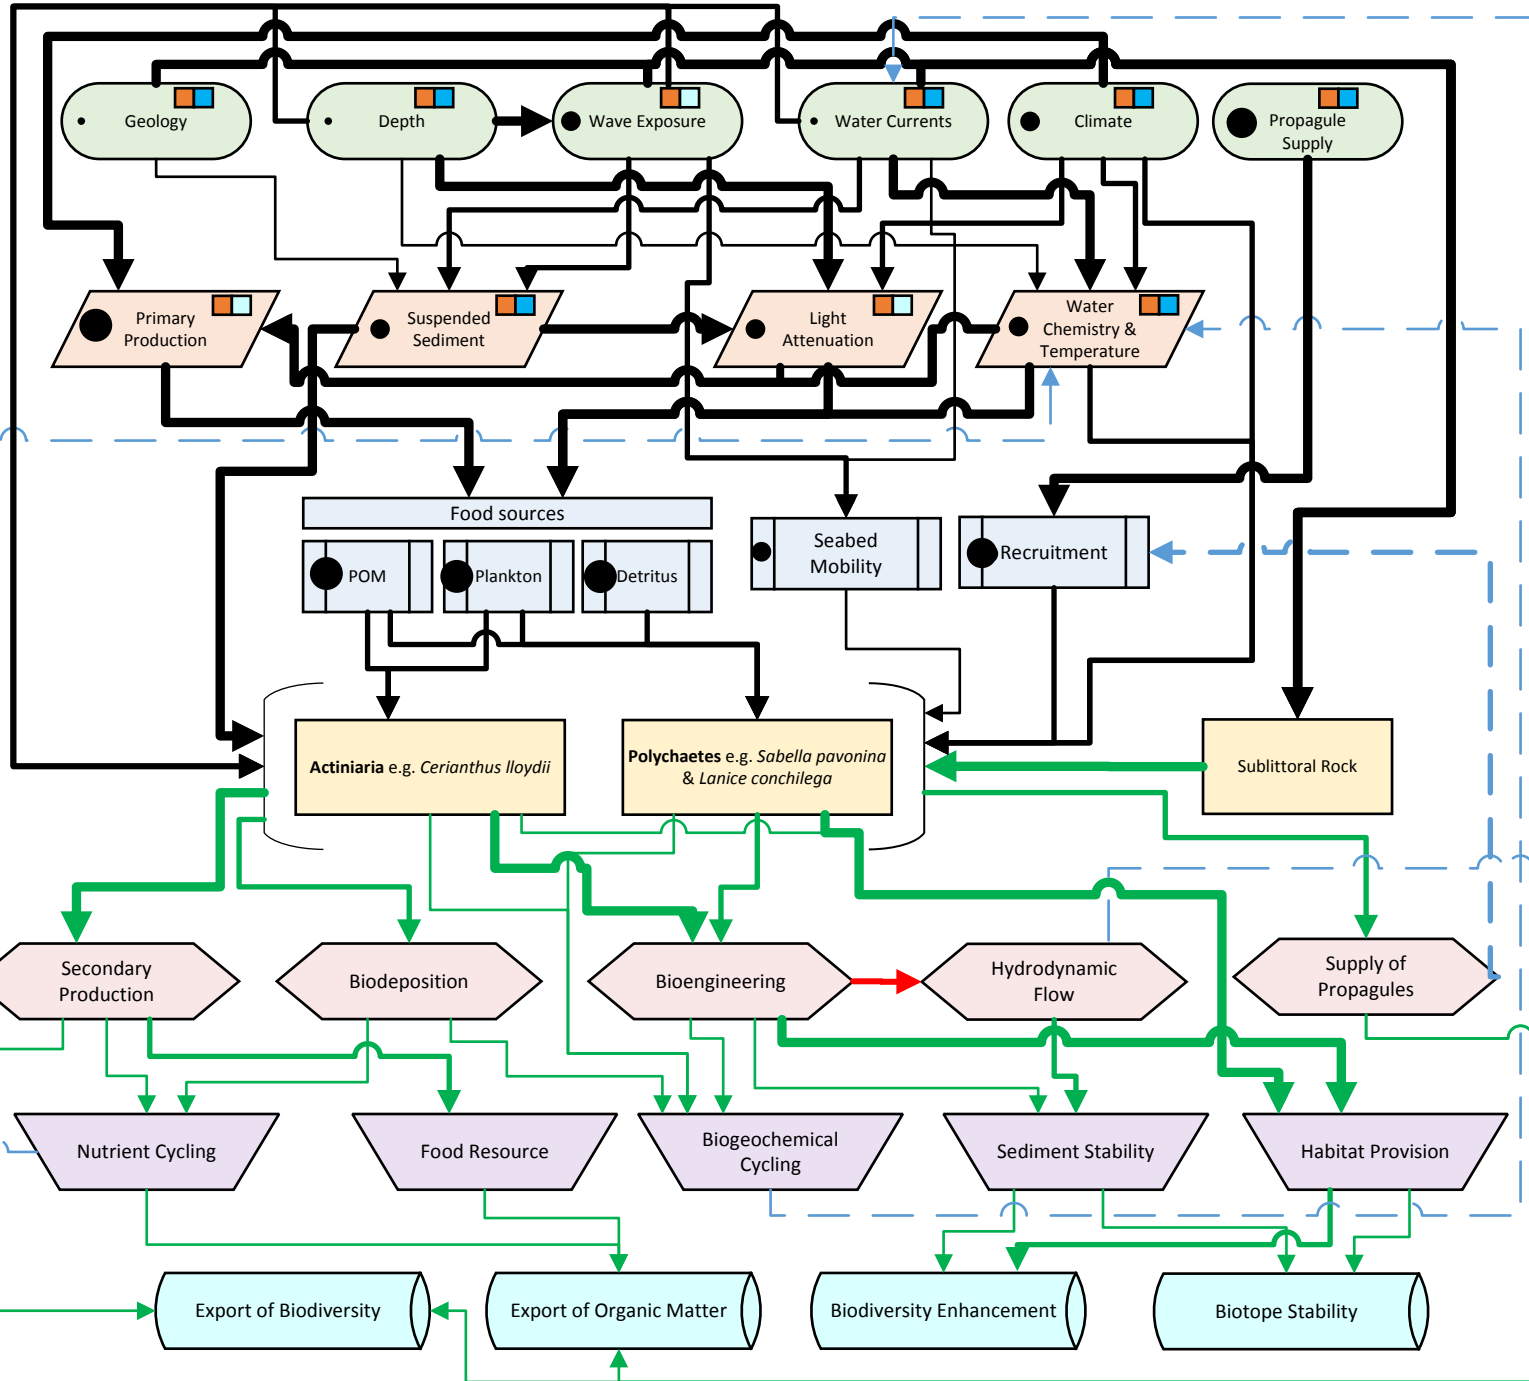

3. Local Processes/Inputs at the Seabed

4. Habitat and Biological Assemblage

5. Output Processes

6. Local Ecosystem Functions

7. Regional to Global Ecosystem Functions

Legend

Magnitude of Influence

- Small
- Medium
- Large
- Driving Influence

- Positive Interaction
- Negative Interaction
- - - Feedback

Driver Relevance to Infralittoral/Circalittoral

- Low Relevance Infralittoral
- High Relevance Infralittoral
- Low Relevance Circalittoral
- High Relevance Circalittoral

Degree of Natural Variability

- Low natural variability
- Moderate natural variability
- High natural variability

Version 1.0

Please see accompanying report for model restrictions and limitations
