

Sub-model 2. Temporarily or Permanently Attached Active Filter Feeders

1. Regional to Global Drivers

2. Water Column Processes

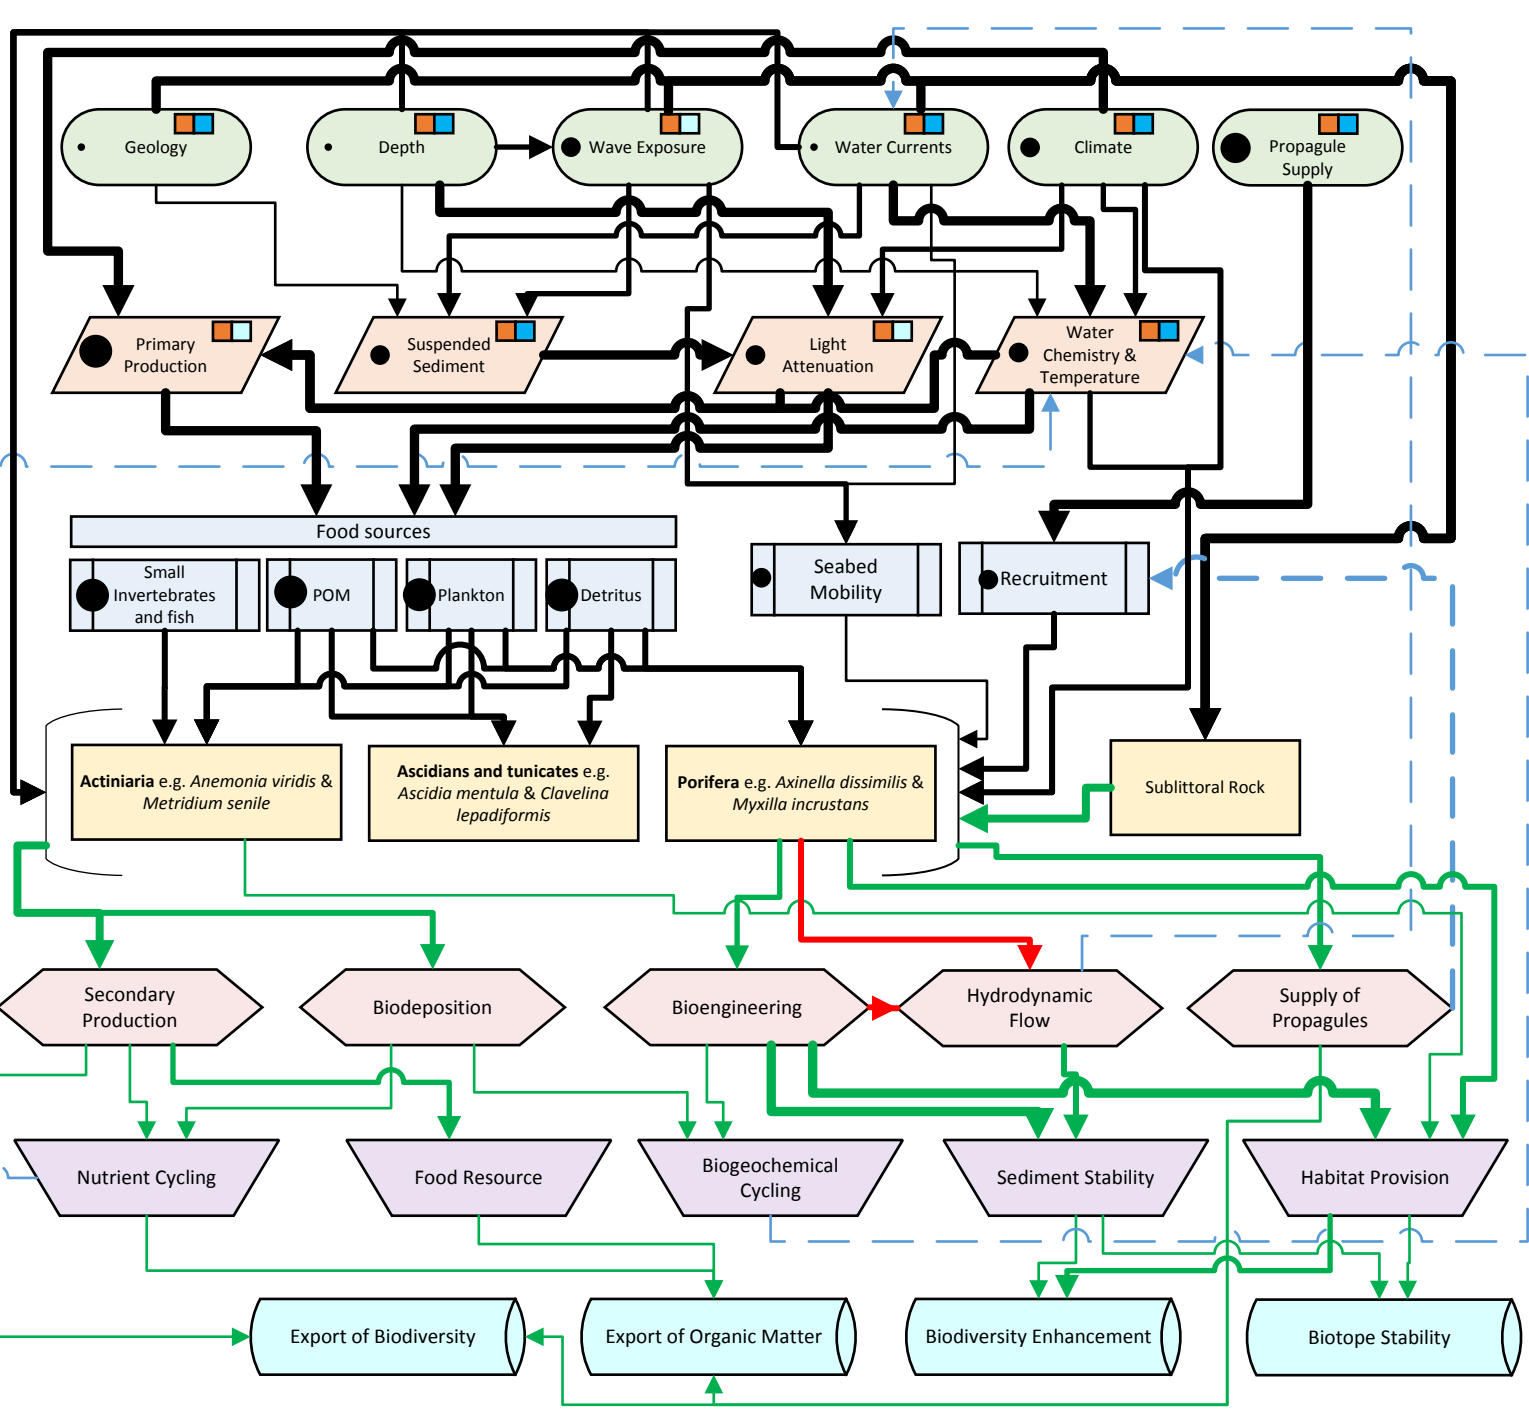

3. Local Processes/Inputs at the Seabed

4. Habitat and Biological Assemblage

5. Output Processes

6. Local Ecosystem Functions

7. Regional to Global Ecosystem Functions

Legend

Magnitude of Influence

- Thin line: Small
- Medium line: Medium
- Thick line: Large
- Thick black arrow: Driving Influence
- Green arrow: Positive Interaction
- Red arrow: Negative Interaction
- Dashed blue arrow: Feedback

Driver Relevance to Infralittoral/Circalittoral

- Orange square: Low Relevance Infralittoral
- Blue square: High Relevance Infralittoral
- Light blue square: Low Relevance Circalittoral
- Dark blue square: High Relevance Circalittoral

Degree of Natural Variability

- Small dot: Low natural variability
- Medium dot: Moderate natural variability
- Large dot: High natural variability

Version 1.0

Please see accompanying report for model restrictions and limitations
